

LNP REMEDIATION & GROUNDING

LNP (liquid metallic polymer) – is specially created for remediating negative and harmful energies, and to help create a 'grounded' property. \$50

Apply LNP (use a Q tip) to the inner four corners of windows, doors and mirrors for proper energetic remediation (the metal part of each corner—inside the building). When a window is divided by columns, remediate all 4 corners of each frame. For doors, just remediate the 4 corners.

Toilets/Sinks – Place 2 drops of LNP on the incoming water line to your toilet, and 2 drops on the pipeline of each sink (below the counter).

Car – Place 2 drops of LNP in 2 places on the dashboard and the bottom of the car (any part of the engine) to 'ground' the car or truck engine (making it healthier for your body to be directly above the engine). Place 2 more drops on the back of the dashboard 'monitor' or 'tv screen'.

House Address – Place one drop on each of the numbers of the metal or other digits of the house address on your home; this balances the sha chi (the energy of the home).

Circuit Breaker – Place 1 drop and 2 EMF stickers or 2 drops of LNP on the circuit breaker, anywhere near the switches.

Home Meter – Place 1 drop on the underside of the meter and 1 on top.

iWatch and Wireless headphones – Place 1 large drop on each ear piece and watch.

Use LNP on the **USB cable** below the port to the **Cell Phone Charger**.

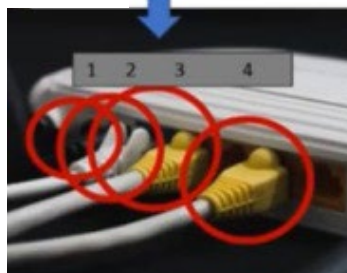

LNP: Use on all plugs.

Don't forget the other end of each wire!

Use LNP here
All 4 cords

LNP Grounding

Wifi Router

Circuit Box: Use of LNP in center of circuit breaker

Use LNP on top of the **SmartMeter**.

Use of LNP on **SmartMeter** – top and bottom

Use of **Pink Granite Stones** at the base of the **Circuit Breaker** and **SmartMeter**

Use LNP on all **WiFi extenders** as shown.
